THE MISSISSIPPI RIVER.

The Onestions of the Levees, the Outlets and the Clearing of the Mouth of Obstructions.

What Old River Men Have to Sav-The Rise and I all of Water-Its Momentum and the Results.

All the Mississippi and the Gulf Stream One and the Same!-If so, What About the Eads Plan of Jetties!

In finding a place for the following mmunications, we do so, believing the levee system to be on trial before the people of the Mississippi valley, candisity confessing at the same time that we are curselves in favor of the use of the natural outlets and channels, of which our friend Cowden writes so intelligently and Hon. Jefferson Davis, the be precious to us, pressed upon the attention of the government the extension of regard to such matters, in the Union the signal service to the agricultural re-

Opposed to Levees EDITORS APPEAL-Since the tide of our great spring flood has passed away mer, in whose special behalf it was men can calmly look over the ruin and thirst organized; and, as was his wont, he devastation which follow in its wake in a spirit of inquiry, in order to fully investigate all the causes, and if possible, devise some rational plan to avert in wishes, that we hope will yet be more future similar catastrophes. We must than realized. The suggestions of Mr. look beyond the contracted views which have the contracted views with the contracted views with the contract of the property of the contract instigate only the building of levees. A plot of errors which has so often blasted ur expectations and proved the fact that the mighty river cannot be hemmed tion, and thanking him for them, in in by embankments which may become took, and the planters of our soluble and yield like quicksand when-own and the neighboring States, water are sufficient to force through so we are also minded to thank feeble a barrier. We must look beyond General Myers for his prompt answer, | the levee system to another set of exand also to express the hope that the scale, will prove in the end far less expensive, and will, I think, secure this expressed upon the map accompanying wast agricultural region to the growth of the letters and the stations of which are cotton, sugar and cereals, make it the fit abode of culture and refinement, and render it the most desirable, as it is already the most favorable region of the habitable globe. That the general levee which are to prompt the planter to extra | system is a magnificent failure no sensible man can entertain a doubt, and that we may expect security from it alone, I think no one will advocate with all the lights before him, unless he is so per-"signal territory" is divided on the map alluded to by Mr. Proudfit, into That we cannot rely upon the suggesfour sections, the firstembracing part of Virginia, the Carolinas, part of Georgia or upon the projects of a set of engiand Alabama, the whole of Fiorida, being so much of the cotton country as large undertakings by the government, are potent to everybody. How then are ites along the Atlantic coast and the we to process to get at all the tangible gulf of Mexico, following the Fiorida facts that may be brought to bear on coast line to Mobile. The signal this important subject? Simply by instations designated in this territory are cable man on the river whose business Norfack, Ruleigh, Wilmington, Charles-ton, America, Augusta, Savannah, of facts, and whose communications to Jacksonville, Tallahassee, St. Marks legislative buties would be of great service in determining what course should be prises territory embracing the largest from the mountains of the east and

a point about one hundred miles south nation of great works which will for all the aline running west to the Mexican time save the country from inundation. There are many men along the river There are many men along the river who are competent to take a philosophic transfer to the stations and the best by the Rio transfer to take a philosophic within this limit the stations and the stations and effects, and whose the stations are department to take a philosophic and the value to the gulf, how much plish the object at one-tenth the expense, and whose the stations are department to take a philosophic and the value to the gulf, how much plish the object at one-tenth the expense, and whose the stations are department to take a philosophic and the value of the parameters. Any old boatman which was the case in times gone by, and could have shown him how to accomplish the property of causes and effects, and whose the property of causes and effects and whose the property of causes are the country from insulation. It the stations are infontgomery, Opelika, suggestions are much more valuable Vicksburg, Meridian, New Orleans, than those of a set of officials whose It he stations are idongomery, Opalina, yierday and provided the stations of t Meridian, New Orleans,

sissippi floods, and I know his judgeneed and opinions are far in advance of he in- the dreamy schemes that are being concocted to induce congress to spend a mint of money in the vain attempt to mint of money in the vain attempt to accomplish an impossibility. The time cannot be far distant when men will come to their senses and look at facts as they exist; will cease to follow the old fogy idea of putting one hundred cubic feet of water into fifty feet of space—a compression beyond the surface for reduction when subhundred cubic feet of water into fifty feet of space—a compression beyond its espacity for reduction when sub-time espacity for reduction when sub-time espacity for reduction when sub-time espacetized for reduction when sub-time espacetized for reduction when sub-time espacetized for reduction and the sub-time espacetized for reduction when sub-time espacetized for reduction and the sub-time espacetized for reduction when espacetized for reduction when espacetized for reduction when espacetized for reduction espacetized for reduction when espacetized for reduction espace jected to great mechanical powers, while the enormous estimated expense therefore impossible. They will then see the present plans are delusive, as the unnumbered failures, ruined plantathe first place, then, we are gravely

A Washir groun dispatch states that Colonel H. C. Whitely, chief of the secret service, has not resigned, but has deto of the District of Columbia, will be properly paid on proper statements and have riven six and a half feet higher than they did, if the river banks had been properly leveed opposite and the properly leveed opposite and Charles lown, West Virginia, Sunday.

The President and family were in Charles lown, West Virginia, Sunday.

the St. Francis, and in eturning it by the Yazzo river above Vicksburg, after having dissipated it greatly by the long route through the length of the pass and river. In the interval between Helena and Vicksburg, the Mississippi being relieved by the Yazzo pass comes in the level by the Yazzo pass comes in the lieved by the Yazoo pass, comes in the | levees were hardly known above Vicks-White and Arkausas rivers, and about burg; thirty years later and two-thirds the head of the back-water up the Ar- of the bank above there, including some the bead of the back-water up the Arkaneas from the Mississippi river originste at no great distance the bayous
Mason and Bartholonew, whose joint
capacity are equal to the floods of Arkaneas and White rivers and capable
of conveying them to the Red river and
thence again back to the Mississippi
river. Near the head of the bayou
Atchafafaya, which has a caliber sufficient to chamber the excess of water
brought down by the Bartholonew and

of the bank above there, including some
of the greatest outles were leveed, yet
falled to bring the waters to previous
hights; think of it, a body of water of
four and a haif scuare-miles of surface,
by six and a half feet in depth, passing
Memphis in a single hour, and
that too, over and above one of
her highest floods. Will the judge
pleasefigure up how/many trillions subjected of surplus water would thus pass
during an ordinary overflow, say from brought down by the Bartholomew and Mason, with that of the Red river, and thirty to fifty days, and what sized resconduct them to the gulf. The Mississippi, thus relieved of the floods of White, Arkansas and Red rivers, can something about the value of the terrinow afford to take in those of the Big Black, Yazoo, and any others that may fall in below; and any others that may fall in below; and any others that may back into the channel between swells; fall in below; and at every step you may see the remains of outlets through which the river once spread out its waters besuch an idea, I will explain: An inch of the river once spread out its waters before levees were ever thought of, and
where nine-tenths of the land now suiject to overflow was securely perched
above the waves of the overflowing torrents. I reluctantly give the results of
twenty-five years of observation and reflection, and it is to be hoped that all
practical men will do likewise, in order
that our legislators may know what we
think of the yalue of the present levee. think of the value of the present levee plan; we who are more deeply inter-ected than hired agents and officials can it is only after filling up the bottoms that the river attains its greatest hight. Another absurd idea is that the river is respect. I believe the only help for this extensive alluvial region will be found in a judicious system of out-offs—throwing a sluggish river, but the Mississippi is none of that sort. A stranger, passing up at a low stage, and seeing the sandmost of which have been closed by levees, and also in building local levees, which will amount to a very small consideration, after the two former objects have been accomplished. The local levees in the mind was too deeply envees, if necessary at all, will occupy so gaged with weighter matters. Let him small a space as not to interrere with go on the heads of most of the islands the waste of water, if it should ever at- and see the heavy gravel, among which tain sufficient hight to pass through in-termediate gaps. Thus velocity will be to ten pounds, that have evidently been given the current by the cut-off, enabling the flood which may pass Cairo to reach the gulf in half the time now required to do so, and by the opening of the various outlets, ample space is given to the augmented proportions of the river at flood-hight to expand into a harmless that is good—that there are large treaket which will pass off in due time districts of country that had freshet, which will pass off in due time districts of country that had without injury. In reviewing these outlets, suppose one were made below Cairo, or rather the fixtural ones opened, so as to be able to take off such a flood as the sissippi may do something to reclaim sippi river is an erroneous idea; the only object, I conceive, would be to bring the

Tennessee could afford, and throw it in-to the St. Francis river, which will to make it a paying tob. But I started return it again at Helena into the Miss-issippi. The volume of water left in the feel honestly satisfied real, yet unintenriver below Caire, will be so much re- tional errors exist. All that I profess to lieved as to enable the river to take in know of the river is from close observa-the waters at flood-hight of the Obion, tion. The straightening of the Missisbly. When the flood going through the more extreme points nearer together, St. Francis river renches Helena it will while the intermediates and vast exnecessarily increase the main volume at tents of country would be deprived of An excellent programme of sport has present; but suppose the Yazoo outlet is its benefits. It would certainly not impresent; but suppose the Yazoo outlet is benefits. It would certainly not important them the waters returning from the waters are waters and the water water waters are waters a opened, which by all means should be done, then the waters returning from the St. Francis, will have but little influence, as the pass will divert a vast volume through the bottom on to the have and before it returns to Vicksburg, the great floods from the White and Arkansas rivers are received ed, hence, her bends are at all times with the result and the result are washing further and her results are at all times washing further and her results are received. midway from Helena to Vicksburg, and | washing further in, and her points extending. final victory. THE TILTON-BEECHER MATTER AGAIN.

Wm. F. West, who is mentioned by Theodore Ti ton in his letter to Leonard Bacon, has addressed a letter to some clergymen in which, while he regrets exceedingly that the statements con-tained in Tilton's letter compel him again to take part in this unhappy controversy, he says: "First, the charges against Tilton were made nearly two months previous to my interview with him, and not a few weeks afterward, as stated in his letter. Second, at the time when they were made they were intended to secure the conviction of Tilton if he were guilty. To remove Maury in regard to the gulf stream the stalu which rested on the church to vindicate its paster, they were not an allowed and install the church of not an use of and insecure method of investigating on man under the false pretense of investigating another."

and it seems to be irresistible, and a cur-rent would be formed along the uneven bed of the guif, though small at first, but now, from its constant evolution, suffi-cient to be felt at a great distance from its beginning. This momentum of the great father of waters, so continuous, is what, in my opinion, creates the gulf-stream. Ogining this opinion to be correct, and that the earth is round, or a stroyed her offspring. She escaped. heroid, then is it not a waste of time and money to commence to dredge or otherwise remove the vast accumulation

Mr. John Kelly, chairman of Tam-many hall has forwarded a communication to Mayor Havemeyer in reply to a letter of the convicted police commis-sioners, Gardner and Chardick, tender ing their resignations. He characterizes their letter as an ingenious tissue of special pleading, suggestive of misstate-ments and bold falsehoods, and accuses Chardick of having associated himself with Henry Smith and Gardner to gratify his political aspirations. Finding that the Democratic party was not dis posed to gratify them, the three men formed a ring and excluded their fellow-members, who were upright and conscientious men. He states that the election law of 1872 was most carefully framed by the Republicans to protect the purity of the ballot-box, and that a suggestion from a great R-publican law-yer put the prosecutors on the road to

PLYMOUTH CHURL SUNDAY, of the Roanoke navigation company, of Virginia, at Danville, and my attention Perhaps the largest congression ever seen in Plymouth church attended west was called to the action of currents on terday morning, the announcement, having been made that Mr. Beecher would preach his last sermon previous to his summer vacation. After the regeight years, I have been living in Mem-phis, Tennessee, and have at all times manifested an interest in the great volular introductory service Mr. Beecher read the fifty-fourth chapter of Isaiah, trute of water that continually washes its levee; and now that public attention taking as text for his sermon the fifth verse thereof. From the beginning to the close of the discourse the greatest attention was paid. The regular attendants were well pleased, and the crowd out and unload, and make their exit of curious heard a good sermon but looked somewhat disappointed. There was no reference made by Mr. Beecher tured to express an opinion, the very opposite of Lieutenant Maury, in every respect, and which is entirely original to the letter of Theodore Tilton. When respect, and which is entirely original so far as I know. The Mississippi river is a moving column of water several thousand miles in length, with a memorandum of an average perhaps of four or five miles per hour, and possibly a fall of fifteen feet per mile, this memorandum has been continually the permitted to say from the the services were over the members of Plymouth church and a number of stran gers crowded up to the platform where on Mr. Beecher stood, and a general hand-shaking, which continued for some time, took place. Mr. Beecher looked his pleasantest, and evidently the thun-derbolt had not struck him. When he had shaken the hands of all who could get within reach, and listened to kind expressions of the more distant, Mr.

A female specimen of the civil rights persuasion, on a tramp through Kentucky, in Rock Castle county, a few days ago stopped at a farmer's house, and that night give birth to a child.
